

intellecheck[®]

Why Upgrade to IntelleCheck 3.0?

IntelleCheck 3.0 offers features that enhance and streamline payment processing. The IntelleCheck 3.0 upgrade is free of charge to all of our IntelleCheck clients and takes very little time to complete.

IntelleCheck 3.0 Benefits:

- Utilizes Evisions MAPS (Multiple Application Platform Server) technology. All Evisions products are now installed and maintained on one server!
- Completely web-delivered - Oracle drivers are no longer required on individual PC's and all product updates are handled within MAPS
- Highly secure using AES encryption for all communications from the MAP server
- Ability to integrate with third party imaging systems. Institutions can now create PDF copies of any payment and send it to a third party imaging solution such as Banner Document Management Suite
- New Scheduling and Delivery feature allows users to schedule when direct deposit advices will be delivered via email
- Server side email handling
- Administrators have more control over printing; print functions have been moved to the server instead of the local machine making printer security possible!
- Ability to create positive pay files on the server
- Ability to send Electronic Refunds to students through integration with Higher One!

Upgrading to IntelleCheck 3.0

We are encouraging all of our IntelleCheck clients to upgrade to IntelleCheck 3.0
